

# Yash Tambi

## Technical Lead (Frontend)

+91-8412871238  
tambiyash@gmail.com  
Pune, MH, India

### SUMMARY

Versatile and innovative technology professional with 10 years of comprehensive experience in software development and product management, specializing in frontend development, UI/UX engineering, and product leadership. Proven track record of driving technical innovation, mentoring teams, and delivering high-impact solutions in SaaS and conversational AI environments.

Increased annual recurring revenue by 35%

Improved user engagement by 22%

Enhanced customer stickiness by 20%

Grew customer acquisition by 12%

### EXPERIENCE

#### Technical Product Owner

01/2023 - 02/2025

Pypestream ↗

- Drove product vision and strategy for AI-driven product, resulting in a 35% increase in cumulative Customer Satisfaction (CSAT) scores.
- Leveraged in-house analytics to analyze user feedback, identifying and iterating on key product features - Enhanced user engagement by 22% through data-driven product improvements
- Collaborated cross-functionally with sales, marketing, and customer support to deep dive into user needs - Increased customer stickiness by 20%.
- Managed complete feature lifecycle for strategic initiatives including: Voice-Assist Agent, Dynamic Translation.
- Achieved 12% increase in customer acquisition within one year through strategic feature development.

#### Lead Frontend Developer

09/2019 - 12/2022

Pypestream ↗

- Architected a comprehensive, universal UI component library using React, Redux Toolkit, TypeScript, and web components.
- Refactored communication layer using JavaScript pub-sub design model, creating a versatile service adaptable across web, mobile, and chat platforms.
- Implemented support for external scripts and services as actionable nodes in chatbot responses.
- Led a squad of 3 developers on the chatbot product, providing technical and product guidance.
- Mentored 5+ junior developers, fostering professional growth and team capabilities.
- Enhanced CI/CD workflows by integrating building, linting, and unit testing processes.
- Developed a custom Google Sheets plugin using Google Apps Script to streamline solution publishing workflow.
- Laid the foundation for the Analytics product, implementing responsive dashboards and visualizations.

#### Frontend Developer

10/2017 - 08/2019

Effective Digital ↗

- Contributed to the new integrations in the intranet dashboard product suite.
- Developed and integrated new microapps like Calendar, Polls, CMS, etc into the product interface.
- Assisted in rebranding and enhancing the product releasing v2.0 of the Intranet Dashboard called GreenOrbit (<https://greenorbit.com/>)

#### System Engineer

03/2015 - 09/2017

TATA Consultancy pvt ltd ↗

- Worked for Microsoft as a client developing both internal and client facing applications.

- Worked on tech stacks like Angular.js, jQuery, JS, HTML and CSS.

EDUCATION

**Mechanical Engineering**  
Rajasthan Technical University - Bachelor of Technology

06/2010 - 05/2014

CERTIFICATES

**Product Management Foundations** [↗](#)  
Reforge

04/2023 - Present

Built an essential understanding of the PM role and how to ship features -

- Feature Opportunity Validation - decide what to build and validate if it will create value for users and the business.
- Feature Design - combine an understanding of user needs, business constraints, and design decisions --> design prototype.
- Feature Development - collaborate with engineering partners sequencing work and defining milestones.
- Feature Launch & Iteration - own success of feature by coordinating feature launches and measuring insights.

**Product Owner Fundamentals: IIBA Endorsed** [↗](#)  
Udemy

02/2022 - Present

- Gain an understanding of what the PO role is, the responsibilities, and how POs generate value for organizations.
- Learn the foundational concepts of Agile Scrum including Scrum artefacts, events, and best practices.
- Shift from a Project Mindset to a Product Mindset, where the focus is on maximizing value.
- Learn how to bring a product to life, from vision to creation

SKILLS

Performance Analytics	Prioritisation Frameworks
